

JOSE MARIA ARELLANO

WORK WITH US SINCE 2010

~

Le travail optique de Jose Arellano (1977), nous emmène dans un jeu de perspective inversé. L'objet suit le regard, il confond notre compréhension. Les ombres en peinture, les structures en papier et la délicatesse des angles donnent à ces oeuvres une légèreté convaincante.

Jose Maria Arellano (b.1977) is a Miami based sculptor who contrives interactive visual semblances from epoxies, carbon fiber and paint. Arellano, a creative since a young age became an artist in 2013 going full-time in 2016. Since then, his sculptures have been exhibited at Art Paris, Art Miami, Art Wynwood, Scope Miami/New York, Art Palm Beach, Palm Beach Modern + Contemporary and at the Lelia Mordoch Gallery in Miami and Paris. His optical-kinetic wall sculptures are formulaically skewed and precisely crafted to produce a virtual reality experience uniquely dependent on the perspective and movement of the viewer. They are experiments in optics, perception and interpretation.
